

All your network & security under one umbrella including support of VLAN, VPN and firewall

Introducing the highly anticipated addition to our networking line: the PR60X 10G/Multi-Gigabit Dual WAN Pro Router with Insight Remote Cloud Management. Easily connect and manage internet traffic between wired devices within a secure network to support business operations. This cutting-edge router is designed to meet the needs of businesses

and professional users who require lightning-fast speeds and exceptional connectivity with remote management capabilities. The Dual WAN functionality includes failover protection, ensuring uninterrupted internet connectivity for critical applications and services. The sleek, updated form factor of the router is designed for mounting with the ports in the rear, but can be installed reversed

with the included, rack ears. As an Insight Remote Managed product, configuration and management is simple, stress-free, and available 24/7 from any location.

Highlights

Intelligent Router

Providing all the routing and network segmentation features that a router must have, the NETGEAR 10G/Multi-Gigabit Dual WAN Pro Router with Insight Cloud Management will be the backbone of any modern small business.

10G/Multi-Gigabit LAN/WAN ports keep your data moving at top speed. VPN features, such as IPSec VPN and Open VPN, provide secure connection to a business network remotely. With Network Address Translation (NAT) routing, all the users in your office can access your broadband connection at the same time.

Leverage up to 32 VLANs to separate the network into smaller groups for more secure and efficient use of network resources. Simplify network administration with up to 32 DHCP server assigning IP addresses automatically.

Remote Management

The NETGEAR Insight Remote
Management platform offers visibility and access to the routing features from a single pane of glass. Register, configure, manage and monitor your router with just a few taps from your Insight mobile App or web portal.

Business Grade

The quietly operating 19-inch rackmountable metal unit is backed by the industry's best-in-class 3-year hardware warranty, 90-day free technical support, and 3-year next business day replacement.

NETGEAR®

Simply activate NETGEAR Insight Cloud management to manage your network. Anytime. Anywhere.

Activating NETGEAR Insight Cloud management enables users to experience simpler configuration and deployment from anywhere using the NETGEAR Insight app from mobile devices or the Insight Cloud portal from any device with a web browser.

Unique advanced management features of these Insight managed devices include:

- Remote monitoring and management with performance dashboards and troubleshooting features including remote
 reboot, port and PoE advanced configuration including remote enable/disable/power-cycle, PoE scheduling, and firmware
 updates with auto-schedule mode
- Single pane-of-glass multi-device, multi-network, and multi-site remote monitoring and notifications with the NETGEAR Insight app
- Full-fledged local or remote access for configuration, management, and monitoring on a larger display using your tablet, laptop, or desktop computer through the NETGEAR Insight Cloud portal
- Configurable in-app and email alerts and notifications
- Auto-join and configure (zero-touch provisioning) for additional Insight managed devices added to the network
- Centralized network configuration (policies) across Insight managed switches, and access points for VLANs, ACLs, QoS, LAGs, etc.
- Cloud-based network administration, monitoring, and firmware management

Features and Benefits

| High performance hardware | 10G/Multi-Gigabit throughput and 1x2.5G WAN, 1x10G/Multi-Gigabit WAN/LAN configurable port, 3x2.5G LAN and 1x10G SFP+ LAN. |
|--|--|
| WAN-to-LAN Throughput | When using WAN2 port - 10Gbps max WAN with 17.5Gbps max LAN When using WAN1 port only - 2.5Gbps max WAN with 27.5Gbps max LAN |
| Primary and secondary internet connections | Dual WAN ports for failover accommodating two internet connections to maintain a reliable link. The first connection functions as the primary and the other as a backup. |
| Dual WAN Load Balancing | Distribute network traffic across two internet connections. |
| Leverage up to 32 VLANs | Separate the network into smaller groups for more secure and efficient use of network resources. |
| Supports up to 32 DHCP servers | Allows for automatic assignment of IP addresses, simplifying network administration. |
| Firewall protection against malicious incoming traffic | Prevents unauthorized access to the network and monitors the communications between the network and the outside world with support up to 250,000 concurrent connections. |
| NETGEAR Insight Remote/Cloud Management | Instant discovery, configuration, and management of your network and Pro Router. Free 1-year subscription included. |
| Versatile rackmount design | Reverse mounting rack ears included for front-facing or rear-facing ports as desired for a clean or traditional look. |
| IPSec Site-to-Site VPN | Provides up to 30 VPN tunnels for businesses to connect remote workers, branch offices, and partners to the main corporate network. |
| IPSec Client-to-Site VPN | Provides up to 100 client device connections (max total 100 combined with IPSec Site-to-Site). |
| Open VPN Client-to-Site | Provides up to 100 client device connections. |
| WireGuard | Fast and encrypted VPN, providing up to 100 client device connections. |
| Dynamic DNS | Updates DNS records automatically to reflect WAN IP address change. |
| mDNS Gateway | Allows services such as printer, AppleTV and Chromecast TV, to traverse across VLAN networks. |
| LLDP | Provides a direct line of communication between two systems over the same link. |
| QoS (Smart Queue Management) | Mitigates upload/download latency per WAN port. |
| Link Aggregation Group (LAG) | Combine multiple Ethernet links into a single logical link between two networked devices. |
